PRICE AND DESCRIPTIVE LIST OF

CANTALOUPE

AND OTHER VINE SEEDS

WOODSIDE'S WINNER
Superior to Any Other Early Melon on the Market

SEASON 1938

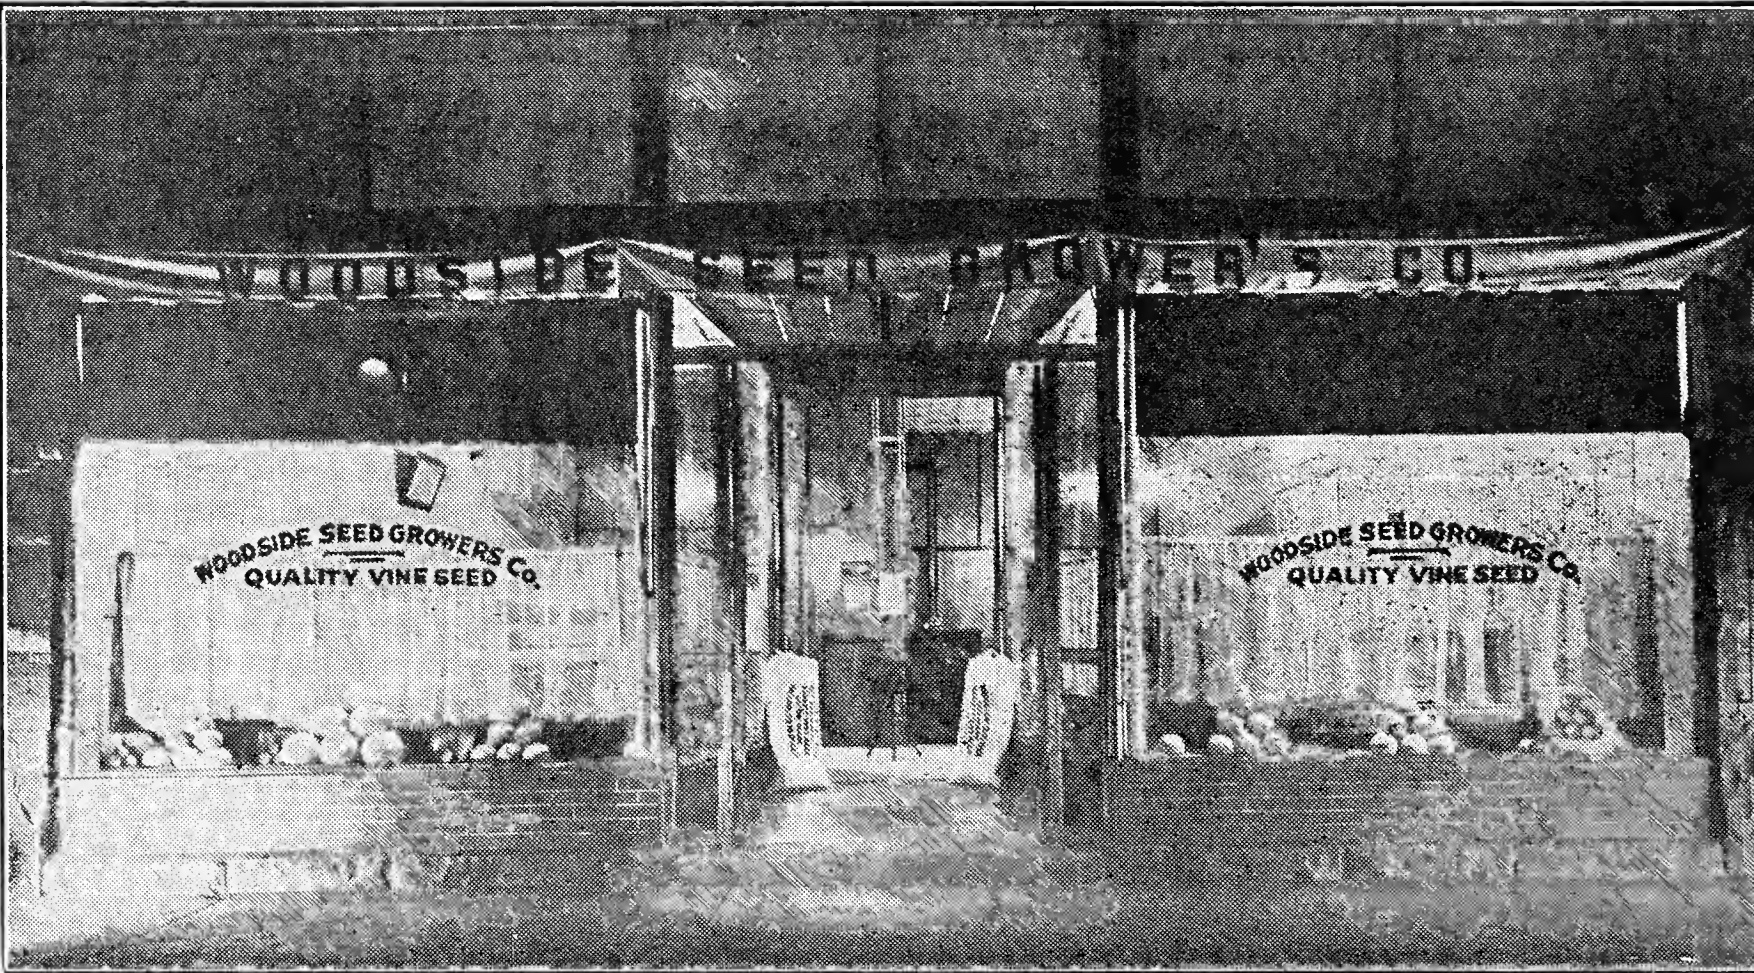

WOODSIDE SEED GROWERS CO.

200 South Main Street, Rocky Ford, Colo.

G R O W E R S O F Q U A L I T Y V I N E S E E D S

To Our Customers

For the past 29 years we have been proud to serve you, endeavoring each successive season to improve each variety of melons so that our customers would always be sure of **QUALITY** seed. It is with a great deal of pleasure that we send you this 1938 catalog, feeling confident that you will be more than pleased with your crop grown from our seed, regardless of the variety you may plant.

OUR STORE FRONT

OUR MOTTO:

“Quality, Service and a Square Deal to All”

QUALITY—Our desire is to make “QUALITY” the first consideration; next to make our prices as low as good seed can be sold; our policy has always been, the best is not quite good enough.

SERVICE—Seed will be shipped same day your order is received.

SQUARE DEAL TO ALL—Your orders, either large or small, will be appreciated, receive our **PROMPT PERSONAL ATTENTION** and filled from select hand-cut seed.

While we don't claim to have the only good seed on the market, we do claim that **THERE IS NONE BETTER THAN THE GRADE WE OFFER.**

ALL PRICES QUOTED INCLUDE DELIVERY TO YOUR TOWN.

SELECTION AND GROWING

Our planting stocks are kept up to the highest standard by systematic selection. Our seed-growing is carried on in the most up-to-date manner. The seed we offer is the best selection from fields grown exclusively for seed purposes; was saved from stock true to type, from well-netted, fully matured, standard-sized melons of the best seed qualities. Our seed is all cut by hand, well-cured, is thoroughly cleaned, all light seed fanned out, and is of the highest germination.

CO-OPERATION

We want to supply growers who want and appreciate good seed. If after ordering from us you have any cause for complaint, we want you to write us fully at once, as just criticism is an aid to improvement; satisfied customers our pride.

WHY NOT BUY ROCKY FORD CANTALOUPE SEED AT ROCKY FORD?

The Rocky Ford district produces and supplies more than 90 per cent of the cantaloupe seed used in the entire country. Practically all of the cantaloupe seed handled by the seed trade is secured either directly or indirectly from this district. Therefore would it not be good business policy to buy your Cantaloupe Seed direct from Rocky Ford, and direct from the producers before it passes through so many hands? Please think this matter over carefully and give us a trial order.

WHEN TO ORDER

We strongly advise our customers to send in their orders immediately upon receipt of this Catalog, as they will then have the seeds on hand when they need them, and avoid the unnecessary delay often caused by the rush of the busy season. It is advisable to order early while our stock is complete—thus avoiding any disappointment.

USE OUR ORDER SHEET

Carefully fill out the blank spaces at the top for shipping directions. Use one line for each kind of seed ordered.

Always carry out the price of each item.

Keep a copy of your order. (This is very important.)

Additional order blanks will be furnished on request.

HOW TO ORDER

Be sure to give your full name, Post Office, with street number or rural route. Remittance may be made by stamps (if one dollar or less) certified check, bank draft or post office money order. We will also ship C. O. D. where one-fourth of the remittance accompanies order.

IN CASE OF ERROR

We exercise the utmost care in filling orders, striving to be correct in every detail; yet in the press of business, errors sometimes occur, in which event we wish to be promptly notified of the fact and we will make such corrections as will be satisfactory.

WARRANTY

All sales made subject to customary disclaimer of the seed trade.

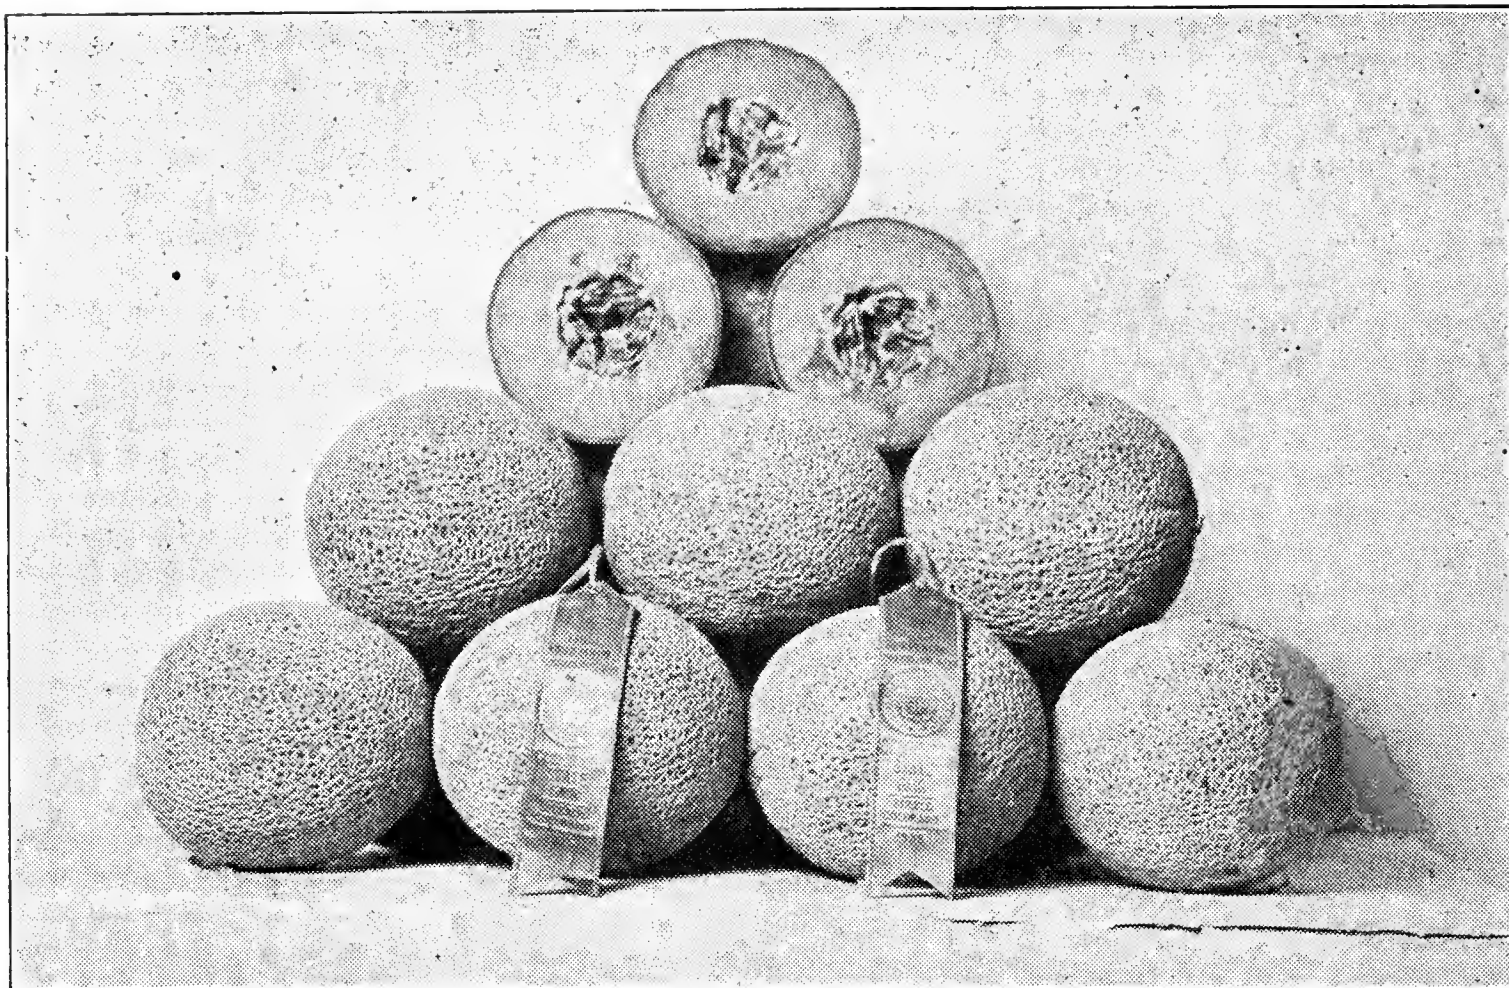

OUR RESPONSIBILITY

As to our financial and business standing, we refer to The Rocky Ford National Bank, any business firm of Rocky Ford, the Packer Produce Mercantile Agency (The Red Book) of Kansas City, Missouri; The Produce Reporter Company (The Blue Book) of Chicago, Illinois; also Dun and Bradstreet of Denver, Colorado. Always enclose a stamp when writing for references.

LARGE PLANTERS—Write for special prices, stating varieties and quantities required.

Woodside's Winner Cantaloupe

LATEST IMPROVED STRAIN OF HALE'S BEST.

ILLUSTRATING WOODSIDE'S WINNER

We feel without hesitation the "Winner" is the finest Hale's Best strain yet developed; has been outstanding in all leading cantaloupe growing districts ever since first introduced; each season we plant an increased acreage hoping to supply the demand, but every year have completely sold out long before the planting season was over; however, we doubled our acreage grown of this variety over what it was one year ago, so feel we should be prepared to fill all orders for "Winner" seed without delay or disappointment; our boosters for this New Melon are actual Farmers and Growers who planted a small amount of the "Winner" seed the first year we put it on the market and now plant their entire acreage of this variety; many write to us stating "I grew the 'Winner' in the same field with other strains of the Hale's Best and find the 'Winner' about one week earlier, an unusually heavy yielder and highly disease resistant; expect to plant my entire acreage of this variety the coming season."

The melon run VERY uniform in size, average about twelve pack flat, have heavy solid net showing practically no stripe or rib, extra small seed cavity in comparison to other Hale's Best strains, the flesh being of a deep pink color; the vines are very prolific which eliminates cull and slick inferior melons.

Through experienced growers we feel safe in advising and saying you will find no better cantaloupe than the "Winner" for home consumption or commercial shipping on the market.

We are sincere in saying that a trial will be convincing; for the "Winner" was awarded all premiums at State Exhibit the first year introduced for appearance, cutting qualities and flavor and still continues to uphold this honor of Supremacy.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 65c; 1 lb. \$1.25; 5 to 10 lbs. @ \$1.10 per lb.; 10 to 25 lbs. @ \$1.00 per lb.; over 25 lbs. @ 90c per lb. Prices Prepaid.

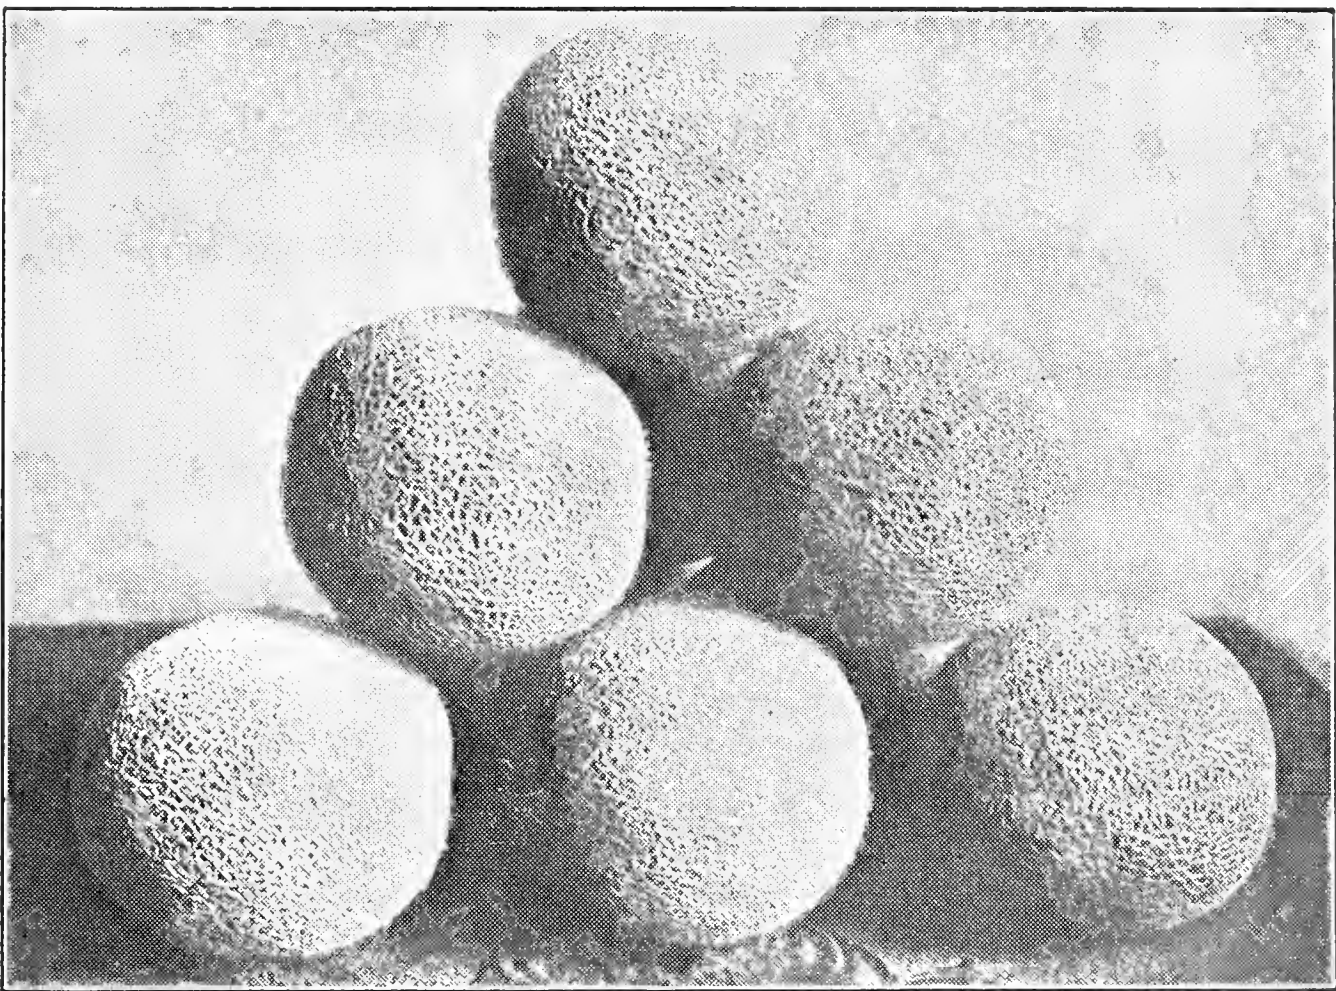

WHEN BETTER CANTALOUPE SEED IS GROWN—WE WILL GROW IT

New Ideal Cantaloupe

ANOTHER IMPROVED STRAIN OF HALE'S BEST

By careful selection this Improved strain of Hale's Best has become another of the outstanding melons in districts where a large uniform early melon is desired; on an average they will produce within eighty days from date of planting.

Have an unusually healthy vigorous vine and very prolific; the melons run strong to Jumbo in size and oval in shape, practically all solid net; the flesh is a deep salmon color, very firm and fine grained. Has an excellent flavor, small seed cavity and a fine shipper.

NEW IDEAL

Since introducing this new melon the trade has praised it very highly; continually have repeat orders and additional new customers each season; our acreage planted for seed the past season continued to show an improvement.

We strongly urge you to give this melon a trial and feel confident you will be more than pleased with the appearance, uniformity, size and yield at harvest time, due to the fact it is adapted to nearly all melon growing districts in the country, where a Jumbo melon is preferred.

We have a limited amount of stock seed of this variety of our own selection which we offer at 25c per pound above the price quoted on our regular stock.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 65c; 1 lb. \$1.25; 5 to 10 lbs. @ \$1.10 per lb.; 10 to 25 lbs. @ \$1.00 per lb.; 25 lbs. or more @ 90c per lb. Prices Prepaid.

Early Hale's Best Cantaloupe

FIRST ON THE MARKET

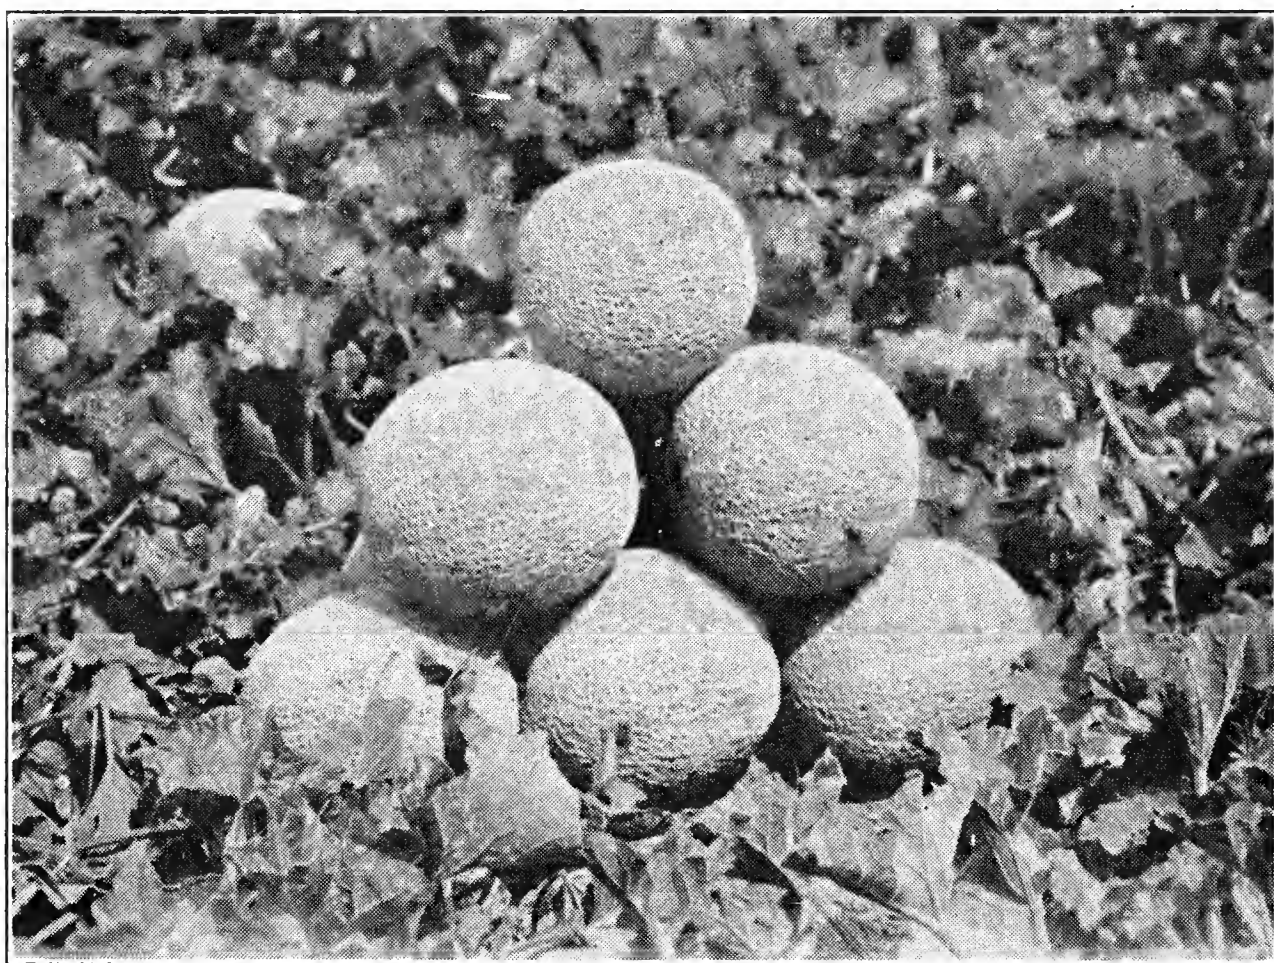

The Hale's Best is the best known cantaloupe in the United States and our seed is all grown from our personally selected stock seed. This cantaloupe is the earliest variety and most favorably known commercial cantaloupe ever introduced.

The melons run mostly jumbo sizes; a large percentage showing a slight rib and faint stripe, yet retains the extreme earliness. The flesh is deep salmon colored, firm and of excellent quality. It is a splendid shipper staying firm for days after being picked.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 65c; 1 lb. \$1.25; 5 to 10 lbs. @ \$1.10 per lb.; 10 to 25 lbs. @ \$1.00 per lb.; over 25 lbs. @ 90c per lb. Prices Prepaid.

Stock Seed @ 25c lb. additional.

Hale's Best Cantaloupe No. 36

HALE'S BEST NO. 36

Even though the Number 36 was introduced to the growers in 1932 it is still one of the largest selling varieties of the Hale's Best strains and is known in every District where cantaloupes are produced.

It can be grown for almost any purpose, home gardens, roadside stands, hauling by truck or packing for distant markets.

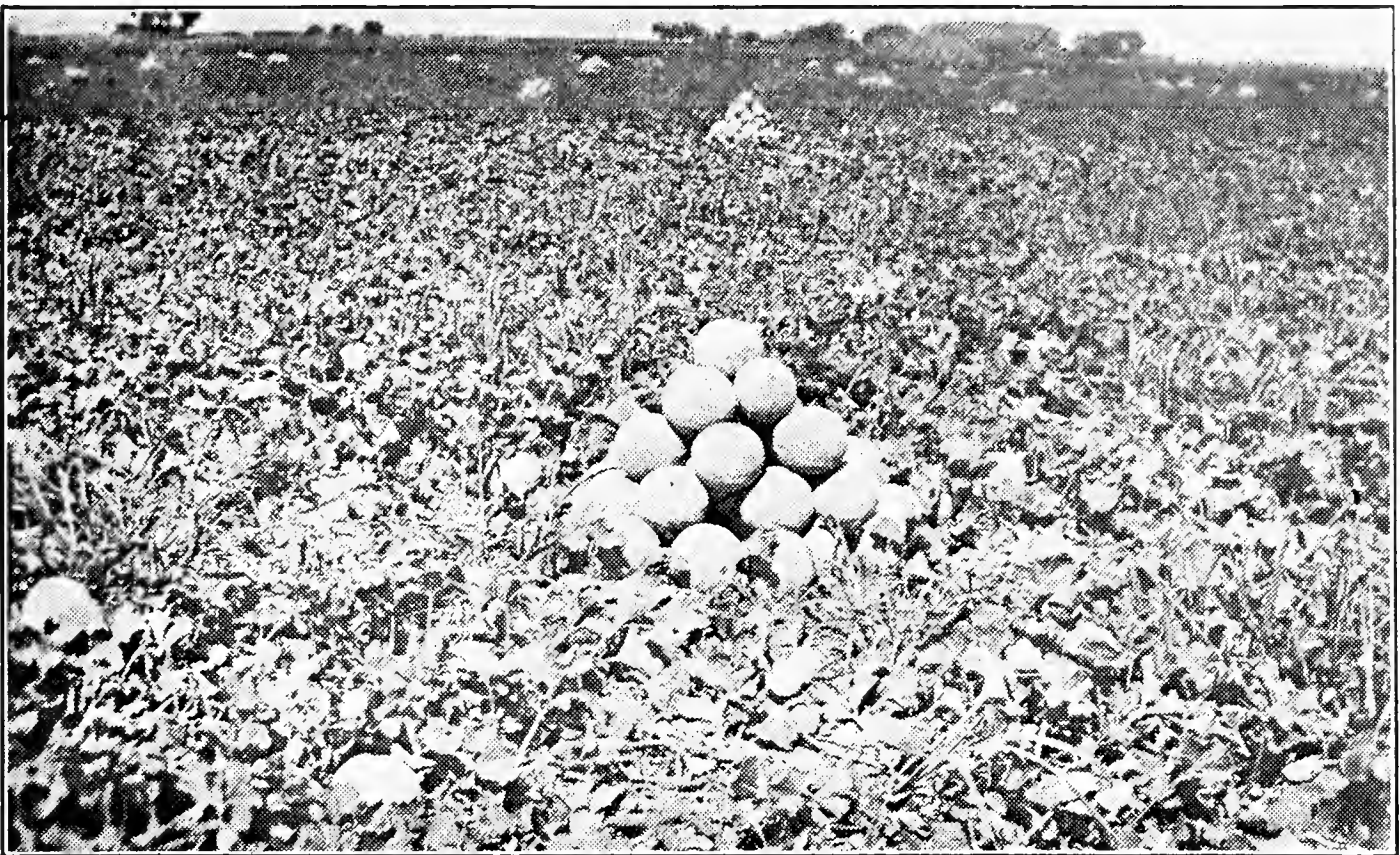

The melons run large and very uniform in size, have slightly oval shape, the flesh is a salmon color of an excellent flavor; seed cavity being much smaller than the original Hale's Best.

The Number 36 is an extra heavy yielder due to the vines being strong and hardy and is one of the earliest to mature for the market.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 65c; 1 lb. \$1.25; 5 to 10 lbs. @ \$1.10 per lb.; 10 to 25 lbs. @ \$1.00 per lb.; over 25 lbs. @ 90c per lb. Prices Prepaid.

PLANT THE BEST AND BE ASSURED OF GROWING THE BEST

Hale's Best Cantaloupe No. 112

HALE'S BEST NO. 112

The Number 112 is still outstanding in many cantaloupe growing districts desiring an Improved strain of the Hale's Best and of a slightly smaller size; in appearance it resembles the Number 36; is a heavily netted melon showing a faint stripe; has a thick salmon colored flesh and of an excellent flavor, small seed cavity and a good shipper; vines make a strong vigorous growth which assures well matured melons throughout the picking season.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 65c; 1 lb. \$1.25; 5 to 10 lbs. @ \$1.10 per lb.; 10 to 25 lbs. @ \$1.00 per lb.; over 25 lbs. @ 90c per lb. Prices Prepaid.
Stock Seed @ 25c lb. additional.

Market Surprise Cantaloupe

This melon was developed by an Illinois grower principally for the Market Gardener that wants an extra large early maturing, well netted cantaloupe, to sell at Roadside Stands and bulk hauling in trucks; if it were packed, would run largely to nine pack Jumbo flats.

For trade desiring Size and Quality included, we feel this melon is unsurpassed; has in most cases nearly a solid heavy net, showing very little of the distinct stripe.

The flesh is thick and of a deep salmon color, small seed cavity and should not be picked until it will slip freely from the vine because of its firmness after it is a golden color.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 65c; 1 lb. \$1.25; 5 to 10 lbs. @ \$1.10 per lb.; 10 to 25 lbs. @ \$1.00 per lb.; over 25 lbs. @ 90c per lb. Prices Prepaid.

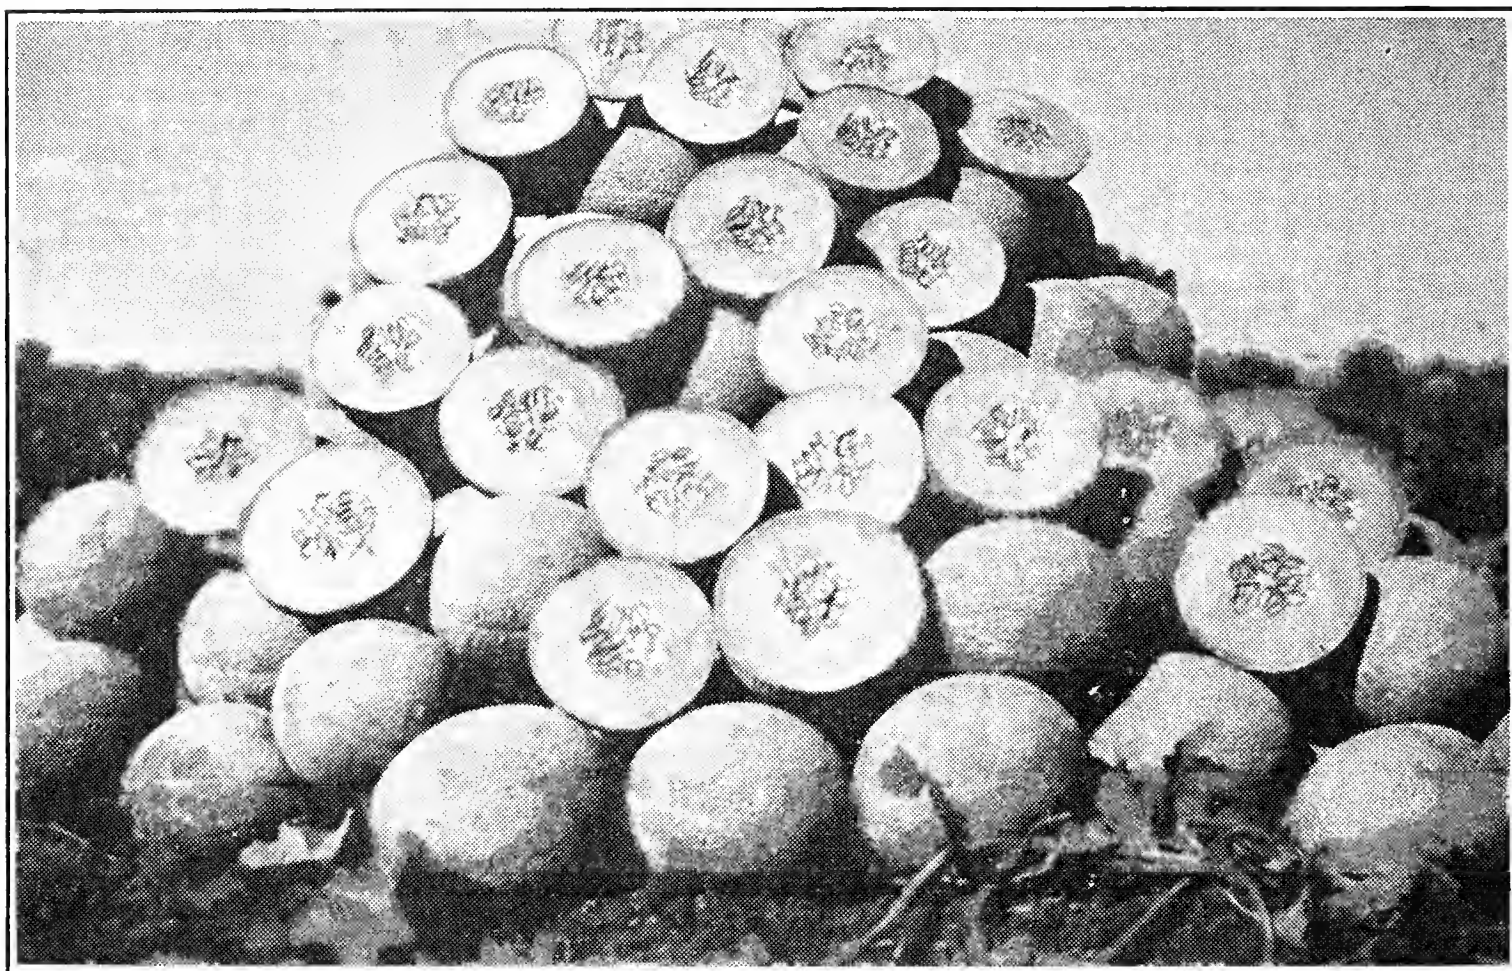

WRITE FOR QUANTITY PRICES ON ALL VARIETIES

Mildew Resistant Cantaloupes

(Recommended for Districts Affected by Powdery Mildew)

The vines of several different introductions are entirely free of any Mildew and Highly Disease Resistant; in some fields for a comparison and test purposes, other Rocky Ford varieties were planted by the side of the Resistant; in these fields the non-resistant strains were immediately killed by Mildew while the Resistant intertwined with them showing no Mildew infection whatever.

Mildew Resistant No. 45

SHOWING SAMPLE OF OUR NO. 45 THE PAST SEASON

The Mildew Resistant Cantaloupe is no longer an experiment; the production and shipping qualities due to the fact the No. 45 must be picked on a FULL SLIP and will then carry to the far distant markets, arriving in perfect condition, has won it Fame for being the most popular of the Mildew Resistant Strains; in other words, as a shipping melon it is unexcelled.

It has practically as heavy a net as the Improved Hale's Best varieties, is similar in shape and very uniform; the melons run strong to Jumbo in size and is really the first of the Resistant strains to have as many of the improved qualities.

The No. 45 has a thick Salmon colored flesh, is well flavored, however the flesh is not as fine grained, neither is the flavor equal to that of the Improved Hale's Best Strains; the melon has a reasonably small seed cavity and is perhaps one week later in maturing than the Hale's Best.

If you want a melon with proven shipping and carrying qualities, a melon that MUST be VINE RIPENED, we advise giving the Mildew Resistant No. 45 a trial the coming season.

PRICE: Pkt. 5c; oz. 10c; ¼ lb. 35c; ½ lb. 65c; 1 lb. \$1.25; 5 to 10 lbs. @ \$1.10 per lb.; 10 to 25 lbs. @ \$1.00 per lb.; over 25 lbs. @ 90c per lb. Prices Prepaid.

LOWEST PRICES FOR HIGHEST QUALITY SEED

Mildew Resistant Cantaloupes

RESISTANT NO. 50

Resistant No. 50

This was the first melon to be released that was entirely free from Mildew; they run rather oblong in shape and vary in size, however will run strong to twelve pack Jumbo flats; the vines make a very vigorous growth, flesh is a salmon color and medium size seed cavity; heavy net but show some stripe.

Resistant No. 50-13

Also entirely free of Mildew, melons run smaller and much more uniform than the No. 50, have a heavy net with prominent stripe; the flesh is very firm and of a deep salmon color and a good flavor; vines are very prolific and have an unusually heavy set; a good melon where your trade demand a smaller size.

Resistant No. 8

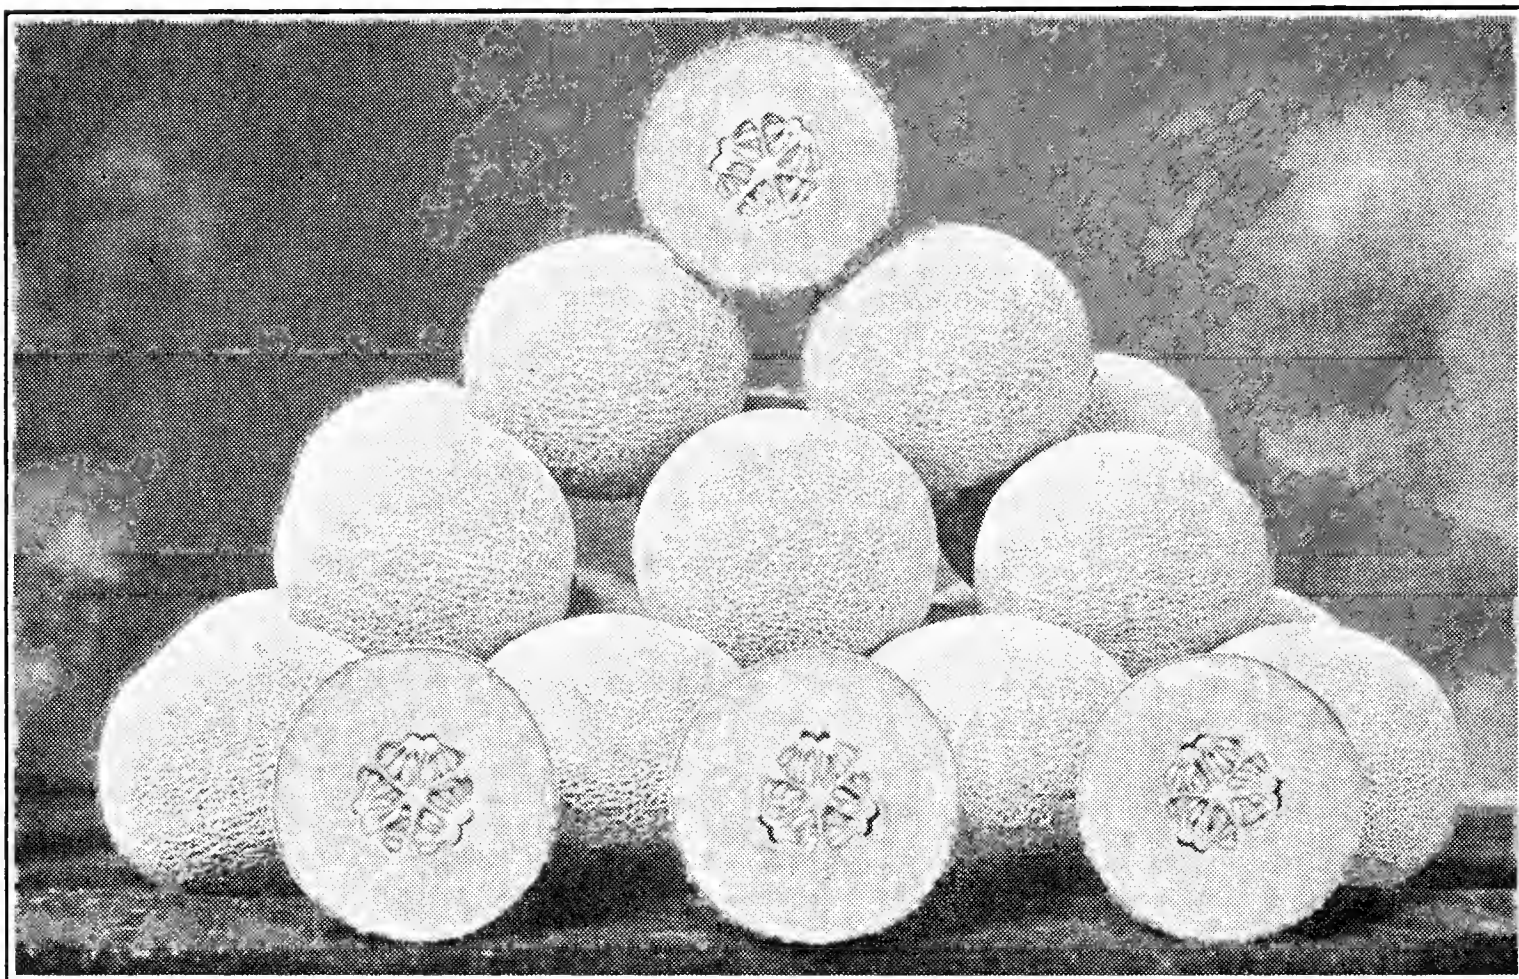

(Also No. 8-1 which is a selection from No. 8)

These melons run extra large and have a very heavy strong vine growth; they are an attractive, well netted melon, have a thick flesh and small seed cavity; are a few days later in maturing than the Hale's Best variety but have wonderful shipping and carrying qualities; due to the large sizes are used in many districts even though not troubled with Mildew, where they require a melon for roadside markets and loose hauling to markets by truck.

PRICE ON ALL ABOVE RESISTANT NUMBERS: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 65c; 1 lb. \$1.25; 5 to 10 lbs. @ \$1.10 per lb.; 10 to 25 lbs. @ \$1.00 per lb.; 25 lbs. or more @ 90c per lb. Prices Prepaid.

"Perfected Perfecto" Cantaloupe

(Also known as Superfecto)

SHOWING OUR PERFECTO MELONS

The originator of the Edwards Perfecto turned his Stock Seed over to us for further development and we introduced the improved melon under the name of Perfected Perfecto; the strain called Superfecto, came from the same stock.

On the strength of the wonderful showing it has become one of the leading varieties in districts that prefer a late maturing melon having wonderful shipping qualities.

The Perfecto ripens evenly and for a long period; melons run fairly large, up to twelve pack Jumbo flat, very uniform in size; coarse, solid heavy net, being perfect in appearance.

The flesh is a very dark salmon color, fine grained and of excellent flavor; the seed cavity averages much smaller than any other Rocky Ford varieties, the rich colored flesh extending to the rind.

The vines make an extra strong, vigorous growth, and are highly disease resistant; due to this fact hills should be spaced farther apart than other cantaloupe varieties.

For a later maturing melon, we urge you to plant the Perfected Perfecto, and are positive that a trial will be convincing.

We have a limited surplus of stock seed of this variety (especially saved for our own planting) which we offer as long as it lasts at 25c per pound above the price quoted on our regular stock.

PRICE: Pkt. 5c; oz. 10c; ¼ lb. 35c; ½ lb. 65c; 1 lb. \$1.25; 5 to 10 lbs. @ \$1.10 per lb.; 10 to 25 lbs. @ \$1.00 per lb.; over 25 lbs. @ 90c per lb. Prices Prepaid.

GIVE OUR PERFECTO SEED A TRIAL

Hearts of Gold Cantaloupe

The vines are hardy, strong, make a vigorous growth and rarely affected by rust. It is very early and prolific; has been known to mature in 70 days from planting.

The melons run from oval to oblong in shape; very uniform in size, averaging a little larger than the Rocky Ford varieties. While it is a ribbed melon, the ribs are not prominent and very heavily netted. The flesh is a rich orange color, fine-grained and of excellent flavor. The seed cavity is small. The melon does not turn yellow when ripe but retains its natural green color and remains solid and firm for days after it is picked from the vine.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 30c; $\frac{1}{2}$ lb. 55c; 1 to 5 lbs. @ \$1.00 per lb.;
10 to 25 lbs. @ 85c per lb.; over 25 lbs. @ 80c per lb. Prices Prepaid.

Improved Pink Meat Cantaloupe

(Also known as Burrell Gem)

This melon is popular in many markets. It is large, averaging about 6 inches in length, tapering at the ends, $4\frac{1}{2}$ to 5 inches in diameter, with well defined ribs, heavily netted, with a distinct stripe between. The flesh is a deep salmon color, very thick and fine-grained. It has a rich, spicy flavor excelled by none. The seed cavity unusually small, which accounts for its superior shipping qualities.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; 1 to 5 lbs. @ 90c per lb.;
10 to 25 lbs. @ 80c per lb.; over 25 lbs. @ 75c per lb. Prices Prepaid.

Arizona Nugget Cantaloupe

This strain was originated in Arizona and is particularly adapted to sections where a smaller sized melon is required. It produces nearly twice as many melons per hill as any other variety of cantaloupes, the first set often showing 12 to 15 marketable melons to the hill. Vigorous vines and extremely prolific. Melons show some ribs and heavily netted. Flesh is a deep salmon color to the rind, fine-grained, very firm and have small seed cavity. Noted for its shipping qualities as they can be picked in a fully ripe stage and arrive on the eastern markets in perfect condition. Flavor is similar to the Perfecto and 101 Special.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 60c; 1 lb. \$1.00; 5 to 10 lbs. @ 90c per lb.;
10 to 25 lbs. @ 80c per lb. Prices Prepaid.

Pearl Pink Cantaloupe

(Also known as Abbott's Pearl)

This melon is a favorite in many sections. The vines are hardy and vigorous. The shape is almost round slightly oval. The color is a whitish-green. It shows no ribs and has a wide, coarse netting. The flesh is a deep salmon color to the rind, fine-grained and very firm. The seed cavity is extremely small, therefore it is one of the best keepers and an excellent shipping melon.

Do not pick this melon until it will slip. If picked as soon as it will slip it will keep for days and ship anywhere.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; 1 to 5 lbs. @ 90c per lb.;
10 to 25 lbs. @ 80c per lb.; over 25 lbs. @ 75c per lb. Prices Prepaid.
Stock Seed @ 25c lb. additional.

Salmon-Tint Cantaloupe 10-25

This melon was introduced in a commercial way several years ago and has proven generally satisfactory in the large growing districts on account of its splendid appearance. The flesh runs very uniform in color, being a rich golden tint near the seed cavity, changing to green near the rind, is very fine-grained, and of excellent flavor. It produces a heavy crop with less unmarketable melons than any variety yet introduced. The melons run from standard to jumbo in size. Very seldom any small ones.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 40c; 1 to 5 lbs. @ 75c per lb.; 10 to 25 lbs. @ 65c per lb.; over 25 lbs. @ 60c per lb. Prices Prepaid.

101 Special Cantaloupe

ILLUSTRATING 101 SPECIAL

This cantaloupe might be classed as a Pink-Meat 10-25, as it has the heavy netting of the 10-25, runs uniform in size but with a deep pink flesh rather than salmon tint. The seed cavity is smaller than that of the 10-25, therefore it is a better shipper. It is a main crop variety and very prolific. The vines make a vigorous growth and are disease resistant. If the seed cavity were a trifle smaller it could be classed as an "Improved Perfecto."

We grew a wonderful crop of this strain, in fact, it was the heaviest crop we have ever produced. We are sure that it will not disappoint you. Many pronounced our seed field as the very best that they ever saw of this variety. We advise growers wishing a melon that is inclined to run smaller due to the very heavy set, to give this 101 Special a trial.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 40c; 1 to 5 lbs. @ 75c per lb.; 10 to 25 lbs. @ 65c per lb.; over 25 lbs. @ 60c per lb. Stock Seed at 25c per lb. additional. Prices prepaid.

Weaver Special

The Weaver Special makes a strong vigorous vine growth and is very prolific. It runs uniform in size and shape. The rind is of a golden color, the light netting similar to that of the Honey Ball and also has the small solid seed cavity of that variety. The flesh is a solid reddish color to the rind which color often shows through the rind. The flesh is firm, the flavor is excellent, between that of the cantaloupe and the Honey Ball.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 65c; 1 lb. \$1.25; 5 to 10 lbs. @ \$1.10 per lb.; 10 to 25 lbs. @ \$1.00 per lb.; 25 lbs. or more @ 90c per lb. Prices Prepaid.

Golden Melodew

It resembles the Honey Dew in color of rind and flesh. The true type runs oval in shape and medium size; the golden rind is covered by a pearly-grey netting which gives it a most attractive appearance. The rich, spicy flavor appears to be a combination of that of the Honey Dew and cantaloupe and is highly praised by all lovers of melons.

It can be picked and shipped about the same as the Honey Dew and IS FULLY TWO WEEKS EARLIER THAN THAT VARIETY.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 45c; 1 lb. 75c; 5 to 10 lbs. @ 60c per lb.; over 10 lbs. @ 50c per lb.; stock seed @ 25c per lb. additional. Prices Prepaid.

Hoosier King Muskmelon

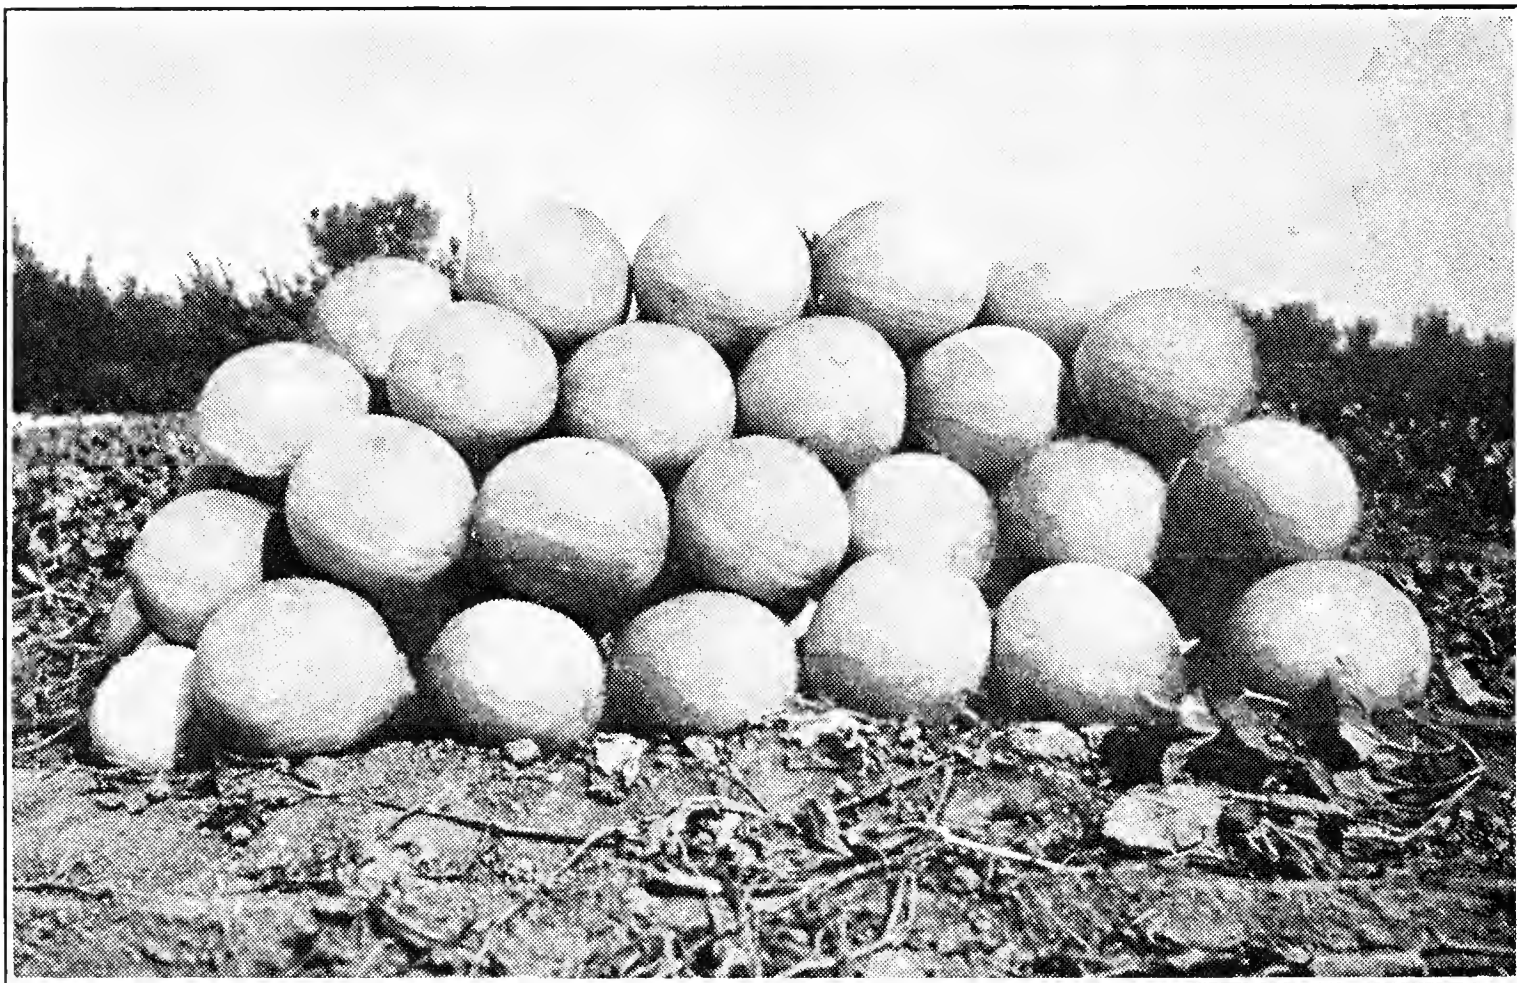

This melon was originated by a Market Gardener in Indiana that operated a roadside produce stand. It is a large ribbed melon slightly oblong with rounded ends. Skin is of a grey color turning to a golden yellow when ripe. Flesh is thick and of salmon color. This melon not recommended for long distance shipping but wonderful for roadside markets, local stores and loose truck hauling.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 60c; 1 lb. \$1.00; 5 to 10 lbs. @ 90c per lb. Prices Prepaid.

Be Wise! Order Woodside Seed.

Green Meat Honey Dew

SHOWING GREEN MEAT HONEY DEW

The Honey Dew although classed as a fall and winter melon, is fast becoming popular all during the shipping season of cantaloupes; although there have been many different selections made trying to introduce a melon superior, very few have proven desirable for any length of time; the Honey Dew requires a longer growing season than the cantaloupe and in the fall of the year if they are stored away from the freezing temperature can be kept for quite a long period, in many cases until Christmas.

The average size is about 6 inches in diameter and 7 to 8 inches long; have a creamy white smooth skin and at maturity turning to a light golden color; green flesh, very thick, fine grained and are extra sweet to the extreme rind.

The quality of our Honey Dew seed was extra fine the past season.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 65c; 1 lb. \$1.25; 5 to 10 lbs. @ \$1.10 per lb.; 10 to 25 lbs. @ \$1.00 per lb.; 25 lbs. or more @ 90c per lb. Prices Prepaid.

Salmon Tint Honey Dew

The outward appearance of this melon is practically the same as the above described Honey Dew having a smooth, hard creamy white rind which turns to a light golden color at maturity. The flesh is a salmon color, very thick and juicy, however hardly as sweet as the regular green-meated melon.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 65c; 1 lb. \$1.25; 5 to 10 lbs. @ \$1.10 per lb.; 10 to 25 lbs. @ \$1.00 per lb.; 25 lbs. or more @ 90c per lb. Prices Prepaid.

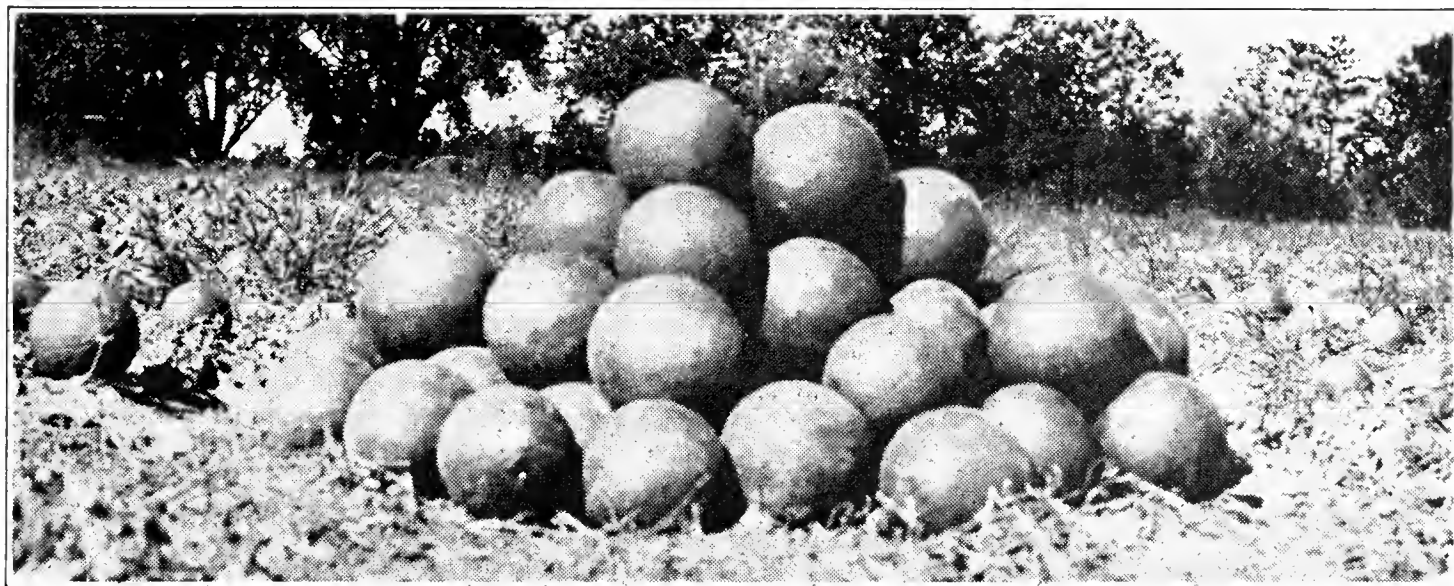

Mildew Resistant Honey Dew

This melon is similar in appearance to the regular green-meated Honey Dew and was introduced principally for planting in the Imperial Valley lower California, due to the fact the growers in that district are greatly troubled with Powdery Mildew; the vines of this melon are entirely free from Mildew and highly disease resistant.

Since being introduced other districts have given this melon a trial and in sections where a hardy vine is essential, we highly recommend this Mildew Resistant strain; by many it is considered to be superior in flavor to the regular Honey Dew, is slightly smaller in size, the flesh is thick, green in color and very sweet.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 65c; 1 lb. \$1.25; 5 to 10 lbs. @ \$1.10 per lb.; 10 to 25 lbs. @ \$1.00 per lb.; 25 lbs. or more @ 90c per lb. Prices Prepaid.

Golden Rind Honey Moon

GOLDEN RIND HONEY MOON

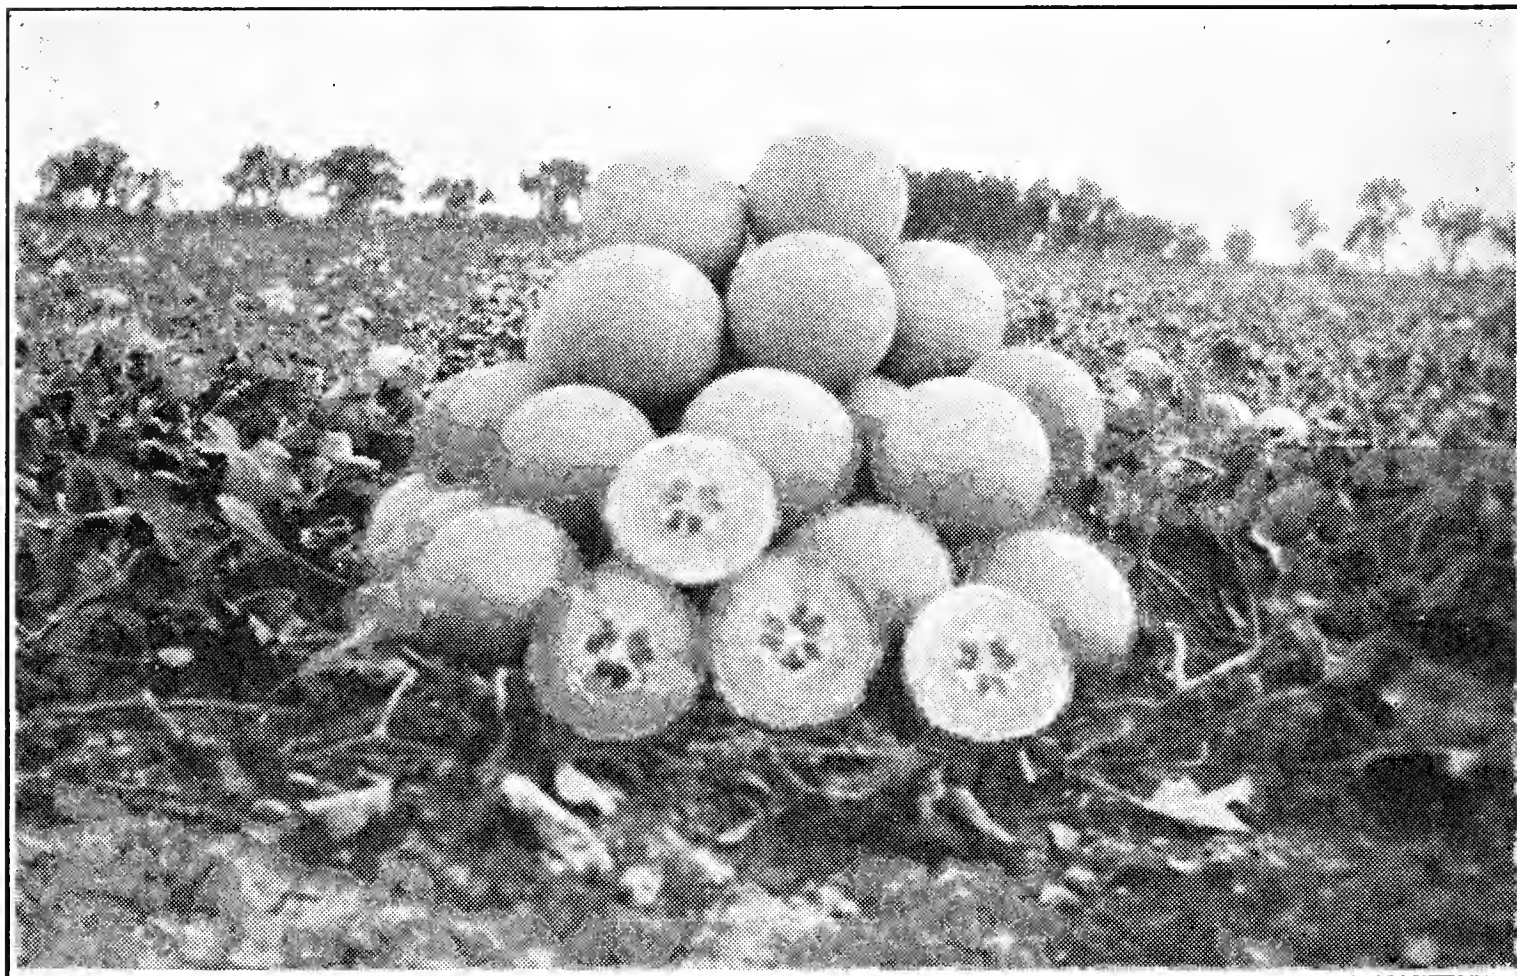

This melon is very attractive. The rind is a rich golden color, even on the under side. The melon does not spot or sunburn like the Honey Dew. It is very prolific and runs very uniform in size. Averages smaller than the Honey Dew and is about two weeks earlier. The flesh is a bright emerald-green to the rind. It does not have the excessive sweet flavor of the Honey Dew but a distinct flavor which is praised by all who have been fortunate enough to taste it. The vines make a vigorous growth and are remarkably disease-resistant, and the melon is a splendid shipper and keeper.

By all means this melon should not be picked until it will slip easily off the vine for when they are dead ripe the flavor is at its best. A trial will prove the merits of this melon.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 65c; 1 lb. \$1.25; 5 to 10 lbs. @ \$1.10 per lb.; 10 to 25 lbs. @ \$1.00 per lb.; 25 lbs. or more @ 90c per lb. Prices Prepaid.

TRY OUR HONEY DEW SEED

Honey Ball Melon

SHOWING OUR HONEY BALL MELON

The vines of the Honey Ball are very prolific and seem to stand more dry weather than most other varieties; the melon in appearance is similar to the Honey Dew but is much smaller and more uniform in size, averaging about 5 inches in diameter, nearly round in shape and is slightly netted; has a very heavy thick flesh with a spicy flavor, to most people superior to the Honey Dew.

It keeps well and is a good shipper. For distant markets, handle about the same as the Honey Dew. For home use and nearby markets, it should not be picked until it will slip from the vine; it is in the best condition for eating when the rind will give under pressure of the thumb, it can be served in halves like cantaloupes.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 65c; 1 lb. \$1.25; 5 to 10 lbs. @ \$1.10 per lb.; 10 to 25 lbs. @ \$1.00 per lb.; 25 lbs. or more @ 90c per lb. Prices Prepaid.

Golden Beauty Casaba

This melon grows from 6 to 8 inches in diameter, is nearly round, slightly pointed at the stem end. The wrinkled skin is a beautiful golden-yellow when ripe and the rind is very hard. The flesh is pure white and very thick. **The Golden Beauty is the best flavored Casaba and the most popular market variety.**

The seed we offer is our own Colorado-grown.

Do not pick for shipping until they lose their green, shiny appearance. They are not in best condition for eating until the rind will give under pressure.

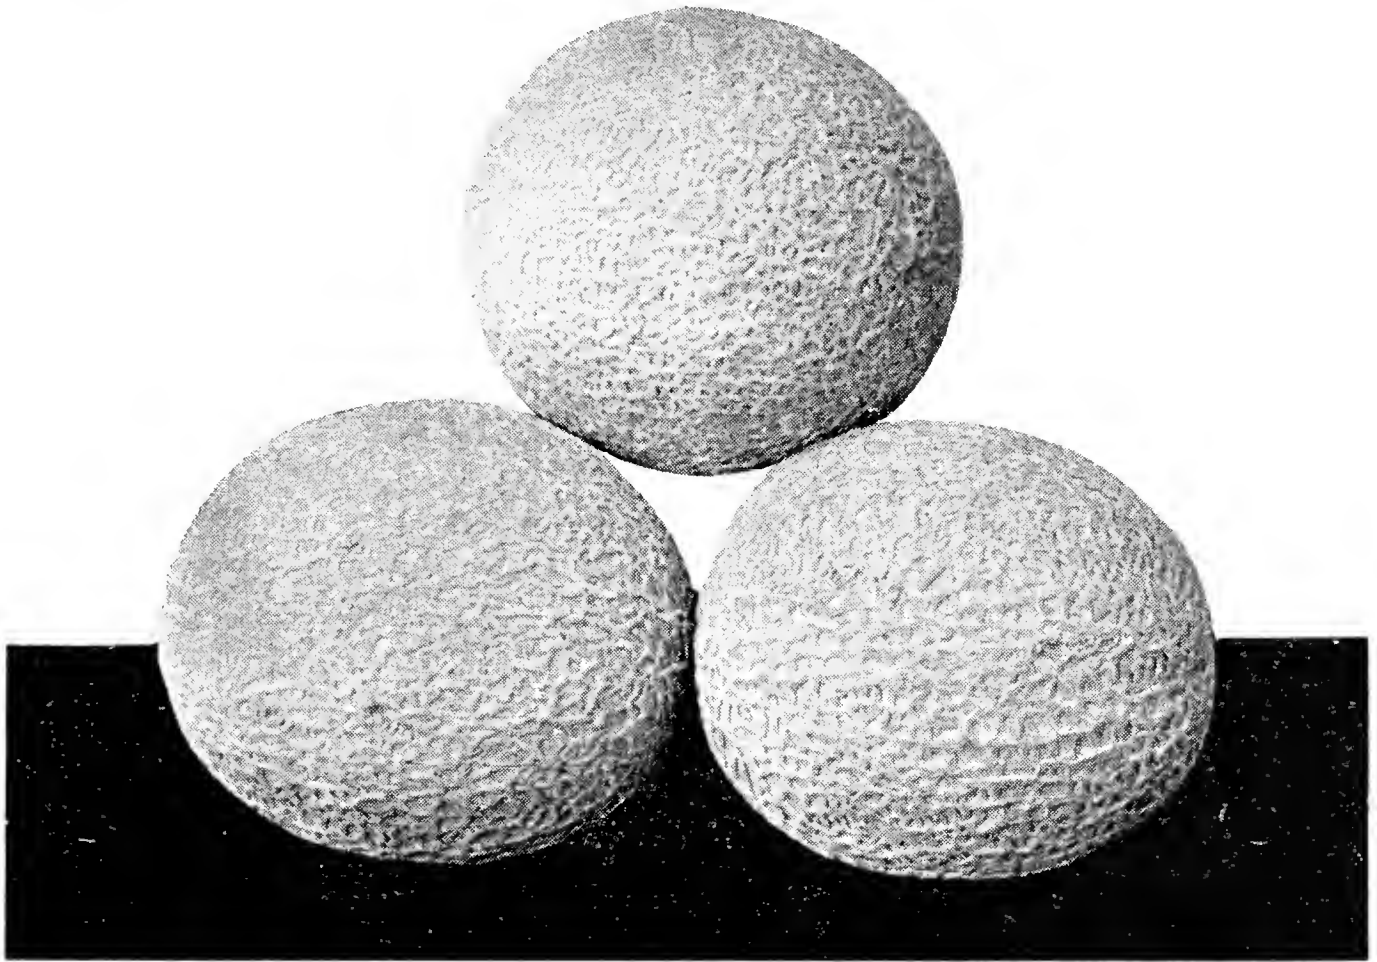

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 65c; 1 lb. \$1.25; 5 to 10 lbs. @ \$1.10 per lb.; 10 to 25 lbs. @ \$1.00 per lb.; 25 lbs. or more @ 90c per lb. Prices Prepaid.

WRITE FOR QUANTITY PRICES ON ALL VARIETIES

Imperial Sunset

OR SALMON TINT HONEY BALL

The skin of this new melon is a light creamy color. Melons uniform in size, mostly standards and jumbos. Oval in shape, heavily netted, seed cavity very small, color of flesh mostly salmon tint, possibly 10 per cent pink-meated and a very small per cent green meat, flavor unusually good.

SHOWING IMPERIAL SUNSET

Makes a strong, vigorous vine (practically immune from disease), and stays green when the vines of the Honey Dew and Honey Ball are practically dead. It matures a little later than above mentioned varieties. It should be picked on the slip. Is one of the best shippers we have ever seen.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 65c; 1 lb. \$1.25; 5 to 10 lbs. @ \$1.10 per lb.; 10 to 25 lbs. @ \$1.00 per lb.; 25 lbs. or more @ 90c per lb. Prices Prepaid.

Stock Seed at 25c per lb. additional.

Baby Persian Muskmelon

This variety has become very popular wherever introduced. For home use and nearby markets it cannot be excelled. It is very uniform in size, approximately six inches in diameter making it very desirable for packing in crates. Almost round without ridges and bright orange in color covered with an open netting. Thick yellow flesh of delightful flavor. It should be picked while firm but not eaten until the rind will give under pressure.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 65c; 1 lb. \$1.25; 5 lbs. @ \$1.00 per lb. Prices Prepaid.

New Wonder Watermelon

(An Improved Kleckley Sweet)

A FIELD OF NEW WONDER WATERMELONS

This splendid variety is the finest flavored melon introduced in recent years. No other melon has ever attained such popularity for home use and near-by markets. As originally introduced, the rind was too thin and tender to admit shipping, but by careful selection this defect has been largely overcome.

At the present time is the favorite shipping melon with our Colorado growers, and rapidly growing in favor in other sections of the country. The melons grow 18 to 24 inches in length, 10 to 12 inches through, averaging about 35 pounds in weight, oblong in form, with very dark-green skin, flesh deep scarlet red, with solid heart, stringless, with few seeds, set near the rind.

It grows larger than the "Kleckley" and has produced melons weighing 60 pounds. Shape is similar to the Watson. The skin is a dark glossy-green. The flesh is a rich red, solid and stringless, fine flavored to the rind.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 30c; $\frac{1}{2}$ lb. 55c; 1 to 10 lbs. @ \$1.00 per lb.;
25 lbs. or more @ 90c per lb. Prices Prepaid.

Klondike Watermelons

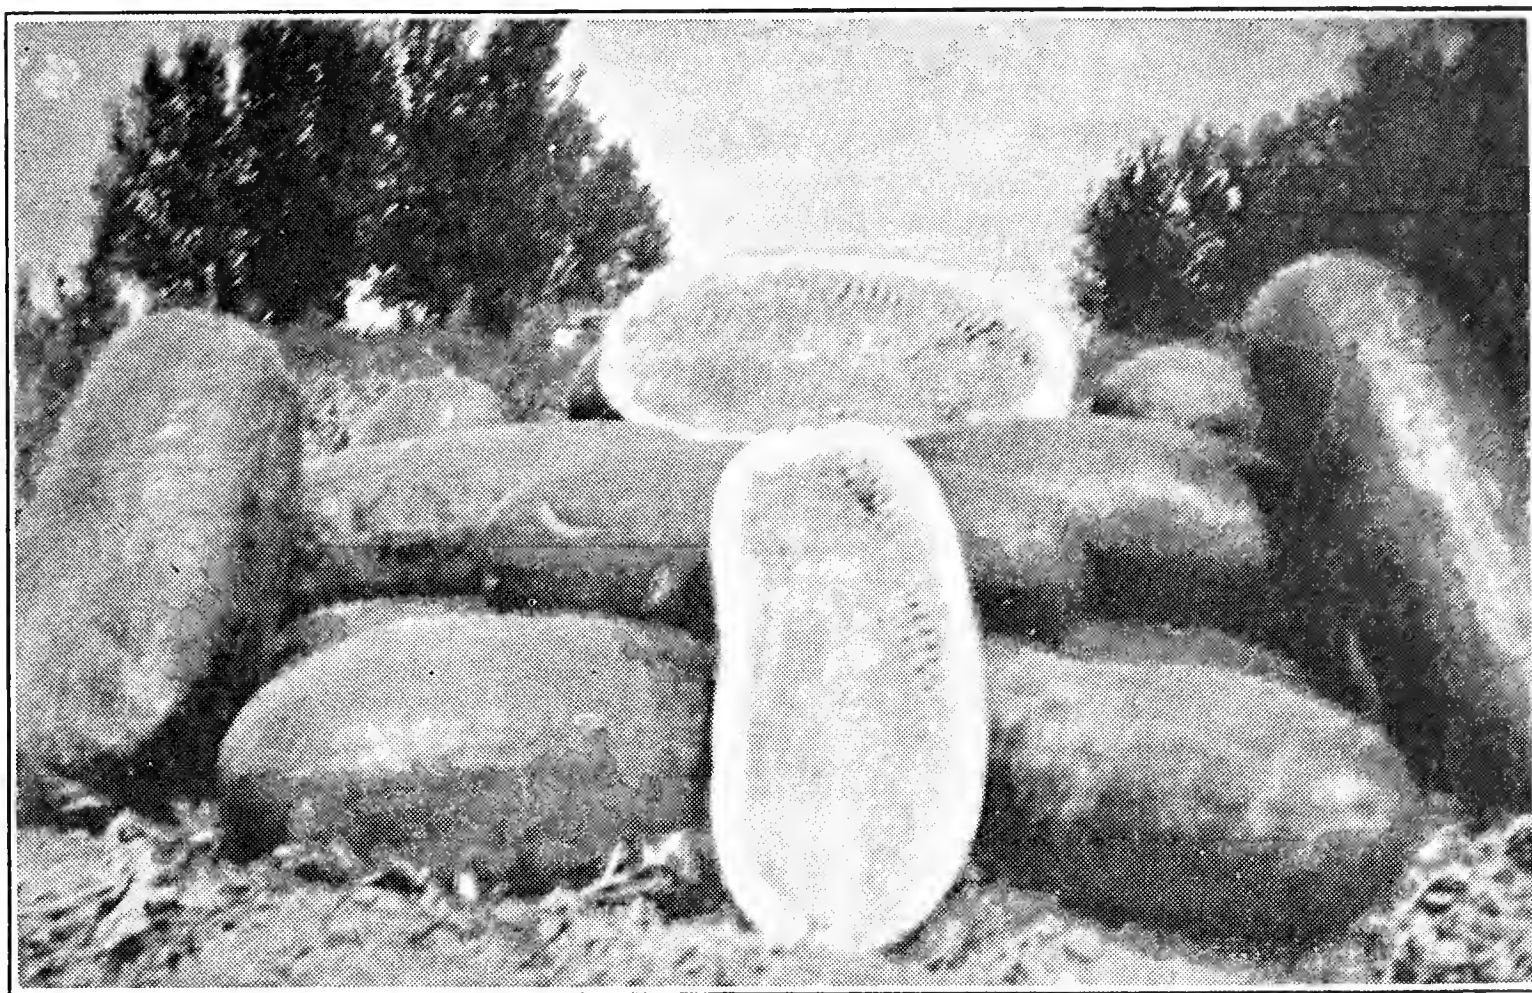

BROWN-SEEDED—There is more of this variety grown in California than any other. Several thousand acres are grown every season in the Imperial Valley. It is a fine melon for local use, and reasonably distant markets. The Klondike is an oblong melon, slightly ribbed, of medium size, and of dark green color. The flesh is bright red, melting and deliciously sweet, and contains but few small seeds. On account of the seed being small a pound will plant almost as much as two pounds of the ordinary variety.

BLACK-SEEDED—The same as above except that it averages a little larger in size and to many, a black-seeded melon is far more attractive than the white or brown-seeded melons.

PRICE: Either Variety—Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 30c; $\frac{1}{2}$ lb. 55c;
1 to 10 lbs. @ \$1.00 per lb.; 25 lbs. or more @ 90c per lb.
Prices Prepaid.

TRY OUR WATERMELON SEED

Cut-Red Tom Watson Watermelon

CUT-RED TOM WATSON

A favorite and old standby in districts demanding a large sized wonderful shipping melon; the rind is thin but very tough; has a dark green color, prominent veins as it ripens to a lighter shade. The flesh is fine grained of a deep red color and very juicy and sweet flavor; melons are oblong in shape with rounded ends.

The seed we offer this season was saved from select melons weighing from 25 to 50 pounds each.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 30c; 1 lb. \$1.15; 5 to 10 lbs. @ \$1.00 per lb.; 25 lbs. or more @ 90c per lb. Prices Prepaid.

Stone Mountain Watermelon

(Also called "Dixie Belle")

This melon is fast becoming a great favorite in many sections of the South, Middle West and South West. It is a great seller in the Roadside markets. It grows large; rather round in shape and is dark green in color. The flesh is a deep red, has but few seeds and the flavor is all that could be desired. For home and nearby markets (where a round melon is favored) it has proven a winner.

PRICES: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 30c; $\frac{1}{2}$ lb. 55c; 1 lb. \$1.10; 5 to 10 lbs. @ \$1.00 per lb.; 25 lbs. or more @ 90c per lb. Prices Prepaid.

Early Kansas Watermelon

An outstanding melon for local markets; is a large oval almost round with block ends, extra early and of a fine quality; the rind is a dark green color with alternate stripes of a lighter shade. The flesh is a rich red color nearly to the rind; and of a wonderful flavor. This melon is rapidly becoming popular on all the mid-western markets. The seed we offer was grown this year and saved from melons that averaged 40 pounds.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 30c; $\frac{1}{2}$ lb. 55c; 1 lb. \$1.10; 5 to 10 lbs. @ \$1.00 per lb.; 25 lbs. or more @ 90c per lb. Prices Prepaid.

QUALITY—SERVICE AND A SQUARE DEAL TO ALL

Winter Queen Watermelons

(Also called the King and Queen)

FIELD SCENE OF WINTER QUEEN WATERMELONS

BLACK-SEEDED—This variety has generally been known as a Winter melon, however, there are many cars shipped from this district during the early fall; they are crated in Honey Dew crates and packed in excelsior. Wherever introduced they sold at good prices, far outselling ordinary melons.

The melon is round; color a very light-green, faintly striped with a darker green. When fully ripe, closely resembles the Honey Dew in size and color, except the light stripe. It has a thin tough rind. The flesh is a bright pink, solid and stringless, with a few small black shiny seeds set firmly near the rind. The flavor is delicious.

GREY-SEEDED—This strain was developed in Utah. We have the originators stock. In appearance it resembles the black-seeded variety, however, it averages larger in size and is a little earlier. It is a great favorite in Utah and the Northwest. Our seed of both strains are Colorado grown. Every season Winter Queen watermelons sell at a premium in this district.

They will keep nearly all winter and are a great treat when all other melons are gone. We advise every lover of watermelons to give it a trial.

PRICE: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 30c; $\frac{1}{2}$ lb. 55c; 1 lb. \$1.10; 5 to 10 lbs. @ \$1.00 per lb.; 25 lbs. or more @ 90c per lb. Prices Prepaid.

Cabbage

We list but two varieties which in the judgment of cabbage growers are considered leaders. The seed we offer of both are grown in Denmark and sold to us to be of extra select quality.

Golden Acre Cabbage (New)

THE EARLIEST ROUND HEAD CABBAGE YET INTRODUCED

This cabbage is becoming popular, as it matures from 10 to 12 days earlier than the Copenhagen Market. The heads are small to medium size, all maturing about the same time. The plants may be set from 10 to 12 inches apart, making a heavy tonnage.

The heads are round, very solid and of splendid quality. Give it a trial both for early market and home use. The seed we offer is grown for us by the best-known Danish growers.

PRICE: Pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 65c; $\frac{1}{2}$ lb. \$1.25; 1 lb. \$2.25;
5 to 10 lbs. @ \$2.00 per lb. Prices Prepaid.

Copenhagen Market Cabbage

MARKET GARDENERS' FAVORITE

The earliest large round-headed cabbage yet introduced. The heads are round, very solid, and exceptionally large for an early variety, averaging from 5 to 8 pounds in weight. It is as early as the Jersey Wakefield, and makes a much heavier yield.

It is short-stemmed but makes a vigorous, compact growth, with but a few outer leaves, which are medium light green. The compact growth of the plant, the solidity of the head, its excellent flavor and extreme earliness, all combine to make the Copenhagen Market one of the most desirable early cabbages.

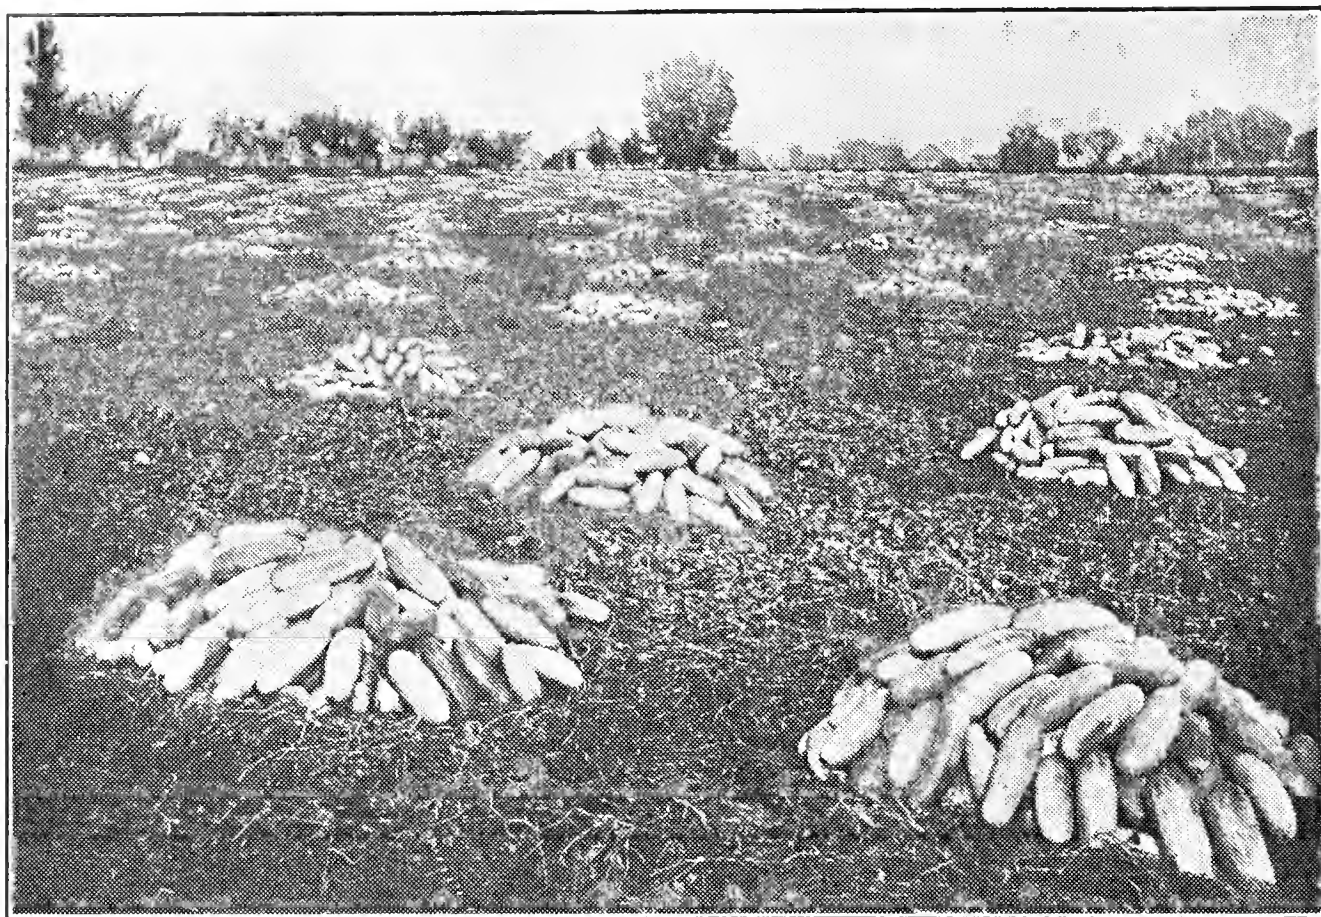

COPENHAGEN MARKET

The seed we offer is imported direct from Denmark by ourselves, and is the best that can be secured.

PRICES: Pkt. 5c;
oz. 15c; $\frac{1}{4}$ lb. 45c;
1 lb. \$1.75; 5 to 10 lbs.
@ \$1.65 per lb. Prices
Prepaid.

Superior Cucumber Seed

SHOWING A CUCUMBER SEED FIELD

Early Fortune Cucumber

One of the finest types of the White Spine EVER PRODUCED, in some respects resembling the Davis Perfect. The cucumbers when fully grown measure about nine inches in length, slightly tapering at the ends. The color is a rich dark green. The flesh is thick and firm and pure white in color; it has but few seeds.

The vines are vigorous growers, set fruit early and are very productive.

THE EARLY FORTUNE is recommended as one of the very best EARLY MARKET VARIETIES.

PRICES: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 40c; 1 lb. 75c;
5 lbs. or more @ 65c per lb. Prices Prepaid.

Woodruff's Hybrid Cucumber

A very uniform, dark green variety, holding the dark color well into maturity. Long, slim, and well proportioned, tapering slightly toward stem end, bloom end less tapering. Ends are blunt. $10\frac{1}{2}$ to 12 inches long by $2\frac{1}{2}$ inches in diameter.

PRICES: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 40c; 1 lb. 75c;
5 lbs. or more @ 65c per lb. Prices Prepaid.

WRITE FOR INFORMATION; ANY QUESTIONS CHEERFULLY ANSWERED

Davis Perfect Cucumber

The color is dark, glossy green, shape slender and symmetrical, average length 10 to 12 inches. Contains but few seeds and is ideal for slicing. The vines are extremely vigorous and productive and resist blight better than other long sorts. A great favorite in all sections of the South for shipping to northern markets. For market gardeners it is one of the most profitable varieties yet introduced.

PRICES: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 40c; 1 lb. 75c;
5 lbs. or more @ 65c per lb. Prices Prepaid.

Black Diamond Cucumber

IT STAYS GREEN

A handsome, early, medium sized, prolific variety. Fruits weigh about $1\frac{1}{4}$ to $1\frac{1}{2}$ pounds, symmetrical, nearly square ended. Very dark green, holds color and firmness well. 7 to 8 inches long by $2\frac{1}{2}$ inches in diameter.

PRICES: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 40c; 1 lb. 75c;
5 lbs. or more @ 65c per lb. Prices Prepaid.

New York No. 515 Lettuce

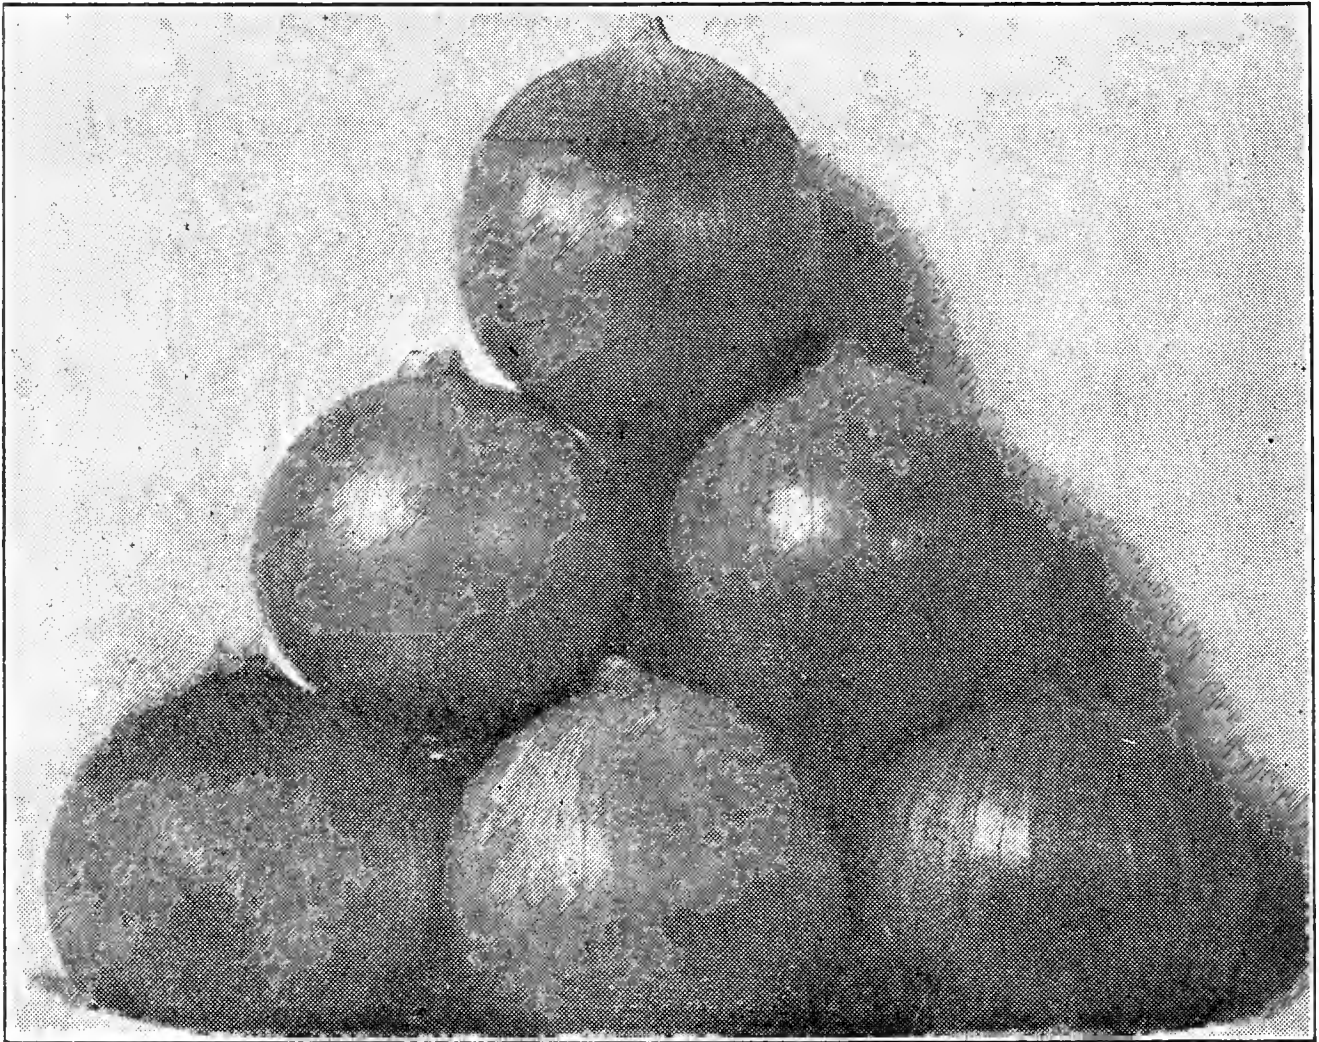

ILLUSTRATING NEW YORK NO. 515 LETTUCE

This variety has almost replaced all other New York varieties. It is resistant to tip burn and will make a sure head under almost any conditions if planted in the right season. It should be planted between April and August. There is a tendency towards ribbiness in the latter part of the season. This variety does best if planted on rich ground. It is a hybrid cross between Iceberg and New York and in appearance resembles the No. 12. It is of a dark color and the shape is the same as the No. 12.

PRICES: Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 35c; $\frac{1}{2}$ lb. 65c; 1 to 10 lbs. @ \$1.25 per lb.;
10 to 25 lbs. @ \$1.15 per lb. Prices Prepaid.

Yellow Sweet Spanish Onion

(RIVERSIDE STRAIN)

SWEET SPANISH ONIONS GROWN FROM OUR SEED

This strain, developed by a large Onion Grower at Riverside, California, is a very large somewhat flattened globe shape and one of the mildest onions known today; however retains the genuine onion flavor. Has a golden yellow skin and white flesh. Thousands of acres of this variety are grown in the Western states each season and shipped from coast to coast.

When properly and thoroughly cured, it is a good keeper, and a splendid shipper. It has been known to yield over 1,500 bushels per acre. It takes from 2 to 3 pounds of seed to plant an acre.

Our California seed is grown by two established seed growing firms whom we feel are the leaders in careful selection of the type of bulbs necessary to produce the quality of seed we are glad to ship and recommend to our customers.

PRICES: Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 70c; $\frac{1}{2}$ lb. \$1.25; 1 lb. \$2.35;
5 to 10 lbs. @ \$2.25 pr lb.; over 10 lbs. @ \$2.15 per lb.

Prices Prepaid.

White Sweet Spanish Onion

This onion is similar in shape to the yellow sweet Spanish, but on an average runs a little smaller in size, has a very white skin and mild flavor. Is a heavy yielder and somewhat earlier. Is one of the best early market varieties but is not as good a keeper as the yellow strain.

PRICES: Pkt. 10c; oz. 30c; $\frac{1}{4}$ lb. 90c; $\frac{1}{2}$ lb. \$1.70; 1 lb. \$3.00;
5 to 10 lbs. @ \$2.75 per lb. Prices Prepaid.

PLANT THE BEST AND BE PLEASED
